Product Change:

New Product:

Obsolete Product:

After 12/31/2000 Fox Electronics will no longer support your JITO-1 requirements.

Our JITO-2 product is a product improvement and in most cases, is a direct substitute. It has come to our attention that some customer designs have circuit runs between the pins of JITO-1. Be advised that Fox does not recommend this practice. JITO-2 has 6 pads versus the 4 pads of JITO-1.
